### **Model Answer**

#### **I- Reading comprehension (5 marks)**

**Answer the following questions:**

**1- What is the topic sentence of the first paragraph? (1 mark)**

Have you notice that sometimes the Moon appears as just a tiny sliver of light in the night sky, and other times it is a big, round, bright circle?.

**2- What is meant by a "phase" of the Moon? (1 mark)**

The Moon phase is called for the many different looks the moon takes depending on what time of the month it is.

**3- Why does the Moon appear to be different sizes? (1 mark)**

The Moon has phases because Earth rotates around the Sun, and the Moon rotates separately around the Earth. The Moon itself does not change size, it's just that different parts of it are in the shadow caused by the Sun's light.

**4- What are the two phases during which the Moon appears almost full, but not quite? (1 mark)**

The two phases during which the Moon appears almost full, but not quite are the Waxing Gibbous phase and the Waning Gibbous phase.

**5- What are the two phases during which the Moon appears as only a tiny sliver? (1 mark)**

The two phases during which the Moon appears as only a tiny sliver are the Waxing Crescent phase and Waning Crescent phase.
